

QT-MULTIKB

Controller

Features

- With the new Quaddrix QT-MULTIKB controller now you can control your DVR and PTZ systems from one single device using your existing RS485 communication network.
- Control your DVR's and PTZ cameras from a single device: the Multi KB allow you to control up to 99 DVR's and can configure up to 255 different PTZ domes directions ()
- Control and configure all the DVR functions: from the Multi KB controller you can manage and configure all the DVR features, such as menu access and DVR menu full configuration, preview visualizations, playback and backup functions.
- Control and configure all the PTZ domes functions: control all the Pan Tilt and Zoom movements, speed dome menu access, special function quick access and calling such as dome preset, auto pan and pattern calling and setting without menu access configuration.
- Easy to wire and connect: use your existing RS 485 network to connect the multi KB with your speed domes.
